## Projects

**KickStarter Clone** (Ruby on Rails, Backbone) live | [github](#)  
crowd funding web application. Find and create projects, upload video, back projects. parsed jbuilder collections, nested composite views and restful API.

**Asteroids** (javascript, canvas) live | [github](#)  
based on the arcade game. Avoid randomly moving asteroids, user your ship to fly in all directions, fire bullets and destroy asteroids. Asteroid, ship and bullet movements manipulated with vectors.

**chess** ( Command line Ruby) [github](#)  
validates moves appropriate to the type of piece. Validates check and checkmate. Pieces that move by sliding or by stepping inherit from a Sliding and Stepping class respectively.

---

**Technologies**     Ruby on Rails, Backbone.js, Javascript, jQuery, SQL, HTML, CSS, git

---
